

REACH-Regulations (02.2026)

Dear Sir or Madam,

With this letter we would like to comment on the Chemicals Regulation 1907/2006 / EC (REACH) of the European Union, which entered into force on 1 June 2007.

1TECOplast GmbH produces order-related turned and milled parts as well as components made of thermoplastic polymers. Chemicals are not manufactured in our company.

Since polymers are generally exempted from the REACH regulation, the product range of 1TECOplast GmbH is not covered by the existing regulation.

If partially used auxiliary materials, such as adhesives or cleaning agents, are classified as REACH products, these are registered by our suppliers or, if necessary, replaced by REACH-compliant substances. A message about possible substances of concern will be sent to us immediately and thus to you.

However, to the best of our knowledge, these excipients are not covered by the REACH Regulation. An interruption of the supply chain can thus be ruled out.

If you have further questions, please contact us and look forward to a further good cooperation.
